### **Optimization Lands Number Three in Rochester Top 100**

ROCHESTER, NY – Optimization has placed third in the Rochester Top 100, an annual list of Rochester's fastest growing private companies. This is the second year in a row that Optimization has finished in the top tier of the list; the company won the number two spot last year. Optimization is also the only engineering and fabrication service provider to make it in the top five.

In an interview with the Democrat and Chronicle, Optimization president and CEO credited the company's competitive advantage as a key factor in success.

"The growth came from the fact that we're concept to completion," said Pollock. "We can do for clients on a single contract what would normally take two, three or four contracts to complete."

The list is based on revenue growth over the past three fiscal years, from 2006 to the present.
