Optimization Celebrates Accident-Free Year

The company reaches one full year of services without a single lost-time accident

ROCHESTER, NY – Optimization announces that the company has completed an entire year of services from all divisions without a single lost-time accident, a large feat for a company who worked over 611,000 hours during 2008, more than half of which was in construction. The company works on over a thousand multi-disciplined projects each year, providing engineering, design and skilled trades services including construction management, rigging, welding, pipefitting, electrical, mechanical, sheet metal and carpentry.

Bill Pollock, CEO, credits the hard work and dedication of Optimization's employees. "These men and women are true professionals who have created and live a culture of safety. Accomplishments like this do not happen without the total commitment of every single member of the team."

Optimization Technology, Inc., a global design, engineering and construction company headquartered in Rochester, New York, provides solutions and services for industrial and manufacturing applications. Optimization has several locations in the U.S., including Rochester, Houston, Syracuse, Boston and Philadelphia, as well as Canadian operations based in Alberta.
