### **Optimization Welcomes New Apprentices**

ROCHESTER, NY – Optimization announces the addition of four new employees to its skilled trades apprenticeship program:

Andrew Lagares – Millwright  
Jason Musshafen – Electrical  
Rob Lippa – Welding  
Zach VanDeWalle – Pipefitting

Each of the apprentices will take college level courses at MCC and work full time on real projects for the company.

LeRoy Quick, manager of the program, notes the importance of building a foundation for long term growth through apprenticeships.

“The third consecutive year of growth of Optimization's apprenticeship program is an investment in our future,” says Quick. “During a time when many businesses are focused on today, Optimization stands with a select few who are preparing for tomorrow and beyond. This progressive thinking promotes confidence in our workforce and to our clients, who recognize the apprentice program as a long term commitment to excellence.”

Optimization has plans to continue to expand the program again next year. For more information, see our [Apprenticeship Page](#).

Optimation Technology, Inc., a global design, engineering and fabrication company headquartered in Rochester, New York, provides industrial and manufacturing applications from concept to completion solutions. Optimation has several locations in the U.S., including Rochester, Houston, Syracuse, Boston and Philadelphia, as well as Canadian operations based in Alberta.
