Renewable Energy the Focus of New Systems Integrator in Broomfield

BROOMFIELD, CO – Optimization Technology, Inc., a supplier of engineering, design, and build services, announced today the opening of a new office in Broomfield, Colorado, 20 miles from Denver. The Colorado branch office specializes in services for energy and medical device industries, while leveraging the National Instruments platform, including hardware and software for test and measurement solutions. The location employs NI Certified Developers and Trainers, who have experience providing concept to completion solutions for a variety of applications and industries.

“It’s great to be aiding local businesses by providing engineering and automation services for research, production, and test systems,” says Craig Eidson, Systems Integrator and General Manager of Optimization Colorado. “Our engineers possess a wide range of capabilities which provide clients with effective and efficient turn-key solutions, qualities that really set us apart in this economy and region.”

##

Optimization Technology, Inc., a global design, engineering and fabrication company headquartered in Rochester, New York, provides industrial and manufacturing applications from concept to completion. Optimization has several locations in the U.S., including Rochester, Houston, Denver, Syracuse, Boston and Philadelphia, as well as Canadian operations based in Alberta.
